

Rig Instructions

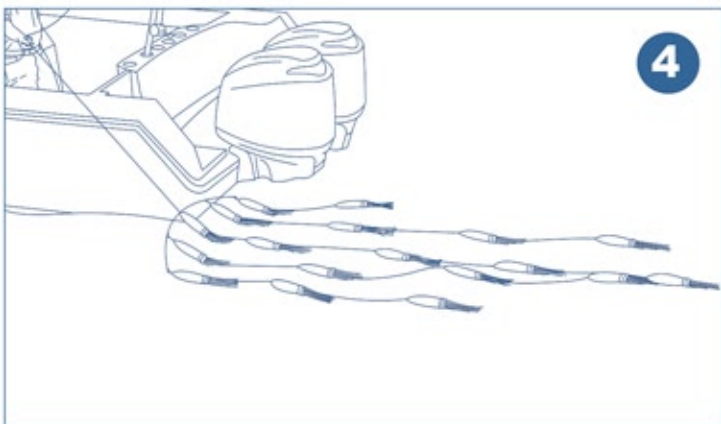

Keep the bar on top of the baits and line: We cannot stress this enough.

1. Un-bag your RockOn rig.
2. With the boat moving but in neutral, deploy the rig from either side of the boat to avoid prop damage.
3. Deploy with the bar on top of lines and bait.
4. Keep out of the prop and let out directly behind the boat.
5. Deploy stinger last. Make sure tentacles are not tangled with hook.

** Checking rig for seaweed and other debris on a regular basis.*

** Fish will not hit rigs with seaweed on them or the bar.*

Keep the bar on top of the baits and line: We cannot stress this enough.
